

The Employer Guide

To Recruiting from the School of Computing at the University of Georgia

The UGA School of Computing consists of Computer Science, Data Science, and Cybersecurity & Privacy degrees. Our majors have seen tremendous growth over the past several years. There are a number of ways you are welcome to engage with our students!

Primary contacts for recruiting include:

Dr. Brad Barnes – CS Undergraduate Coordinator – bjb211@uga.edu

Mrs. Kristina Rust – Career Consultant – ksg02277@uga.edu

Attend Career Fairs and Networking Events

The University of Georgia hosts a Fall and Spring Career Fair each year geared towards students of all majors and interests. Additionally, the Career Center and the School of Computing collaborate to host the Engineering & Computer Science Job and Internship Fair, which also occurs each Fall and Spring semester. For more information on these events, contact Kristina Rust at ksg02277@uga.edu.

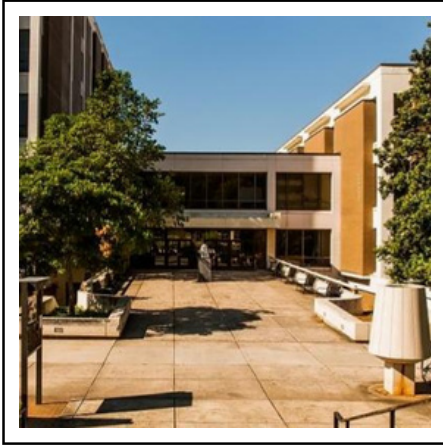

Schedule On Campus Interviews

The UGA Career Center provides interview space for employers to meet with students right on campus. We provide a professional atmosphere with private interview rooms for you to meet individually with students to discuss full-time and internship positions. The prime recruiting seasons typically run from September through November and February through April. To schedule, visit hireUGA.com, click the "Recruiting" tab, then click "Campus Interviews."

Post and Promote Your Jobs and Internships

Allow UGA students to easily find and apply for your positions by posting them for free on UGA's job/internship board, Handshake. To post positions, visit hireUGA.com. You can also send an email to Dr. Brad Barnes at bjb211@uga.edu with the description of the employment opportunity and how students should apply.

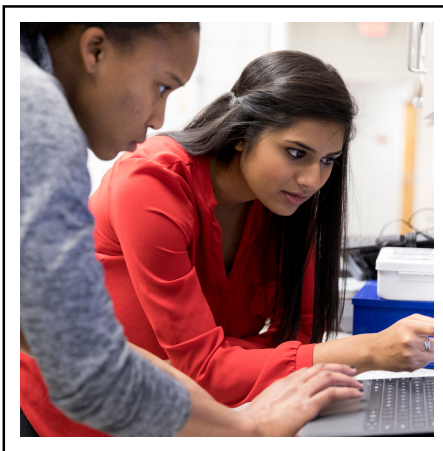

Increase Exposure on Campus

Companies can reserve a table in the Boyd Atrium for the "School of Computing Employer Spotlight." This is an opportunity to meet with a large number of students as they make their way to class. To schedule a date and time, contact Dr. Brad Barnes at bjb211@uga.edu.

Present to Students

The Association for Computing Machinery (ACM) is the department's primary student organization. ACM hosts monthly "Career Nights," where employers can present to students about their company and opportunities. Reach out to ACM Faculty Advisor, Dr. Brad Barnes, at bjb211@uga.edu for more information.

Host an Intern For A Day

Intern For A Day is a voluntary job shadowing experience that ranges from 1 day to 1 week. Students spend time observing and working with employers to gain an understanding of the culture of the organization and its industry. To learn more about this opportunity, visit hireUGA.com, click the "Post Jobs/Internships" tab, then click "Intern for a Day."
